Editor's notes:

### **HISTORY:**

This document was compiled from Microfiche Catalogue 01117, which covered cars built between 07/79 and the end of production. It is dated 03/91, some months after the end of production in July 1990, and it came to me in what looked very much like its original envelope, with a label bearing the following legend:

MIC 01117F

2CV

ED 10/98

This I presume was the last issue of parts catalogue for the 2CV. Whether the suffix F means 'Final' or not I don't know!

The fiches were given to me by a kind Belgian artist called Tony Willems who I visited in January 2005 in Gierle, Belgium.

I had the fiches printed out at my local library, then scanned them into my Mac PowerBook, using a Heidelberg Linocolor 1200 scanner. I scanned in B&W and at 300 dpi. I then cleaned up the images and text in GraphicConverter, and used Acrobat Standard 6 to write the .pdf file and to make the index. I'd say it probably took around 12-1500 hours to do over an unemployed winter. The images were pretty poor, and the text illegible in places, so I had to use the index and content lists to check things, before finally going back to the originals and comparing them on a reader with the results of my work, correcting as necessary. I've sought to optimise the pages for viewing on a PC screen, so white space has sometimes been sacrificed in favour of magnification.

I'm bound to have introduced some errors, though I've tried not to. I've mostly left such errors as I found in the original - especially spelling - but may have corrected a few things which were confusing. If you find errors please do let me know!

### **USING THIS DOCUMENT:**

You should find a bookmark index opening with the parts list (to the left of the scanned pages). The index shows the different Fiches and their general topics. Click on the little arrow to the left of a fiche to open the nested index to that Fiche. Click on the topic you wish to view and its first page will automatically appear on the screen.
